

Zentec: Engineering the Future of Water Treatment

Zentec designs and manufactures high-efficiency, industry-leading surface aerators for wastewater treatment, driven by innovation and sustainability.

What We Do

- Supply of surface aerators
- CFDs of reactors to check flow patterns and ensure mixing
- Retrofits of existing aerators and drive-ends
- Breakdown repairs of wet-ends and drive-ends
- Gearbox and motor repair, refurbishment or replacement

Industrial Solutions, Unlimited Possibilities

Zentec's Products

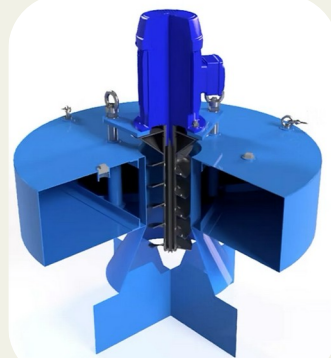

Low Speed Aerator

Zentec's **Thrasher Low Speed Surface Aerator** is a vertical shaft aerator providing efficient oxygen transfer and thorough mixing crucial for effective biological wastewater treatment.

High Speed Aerator

Our **High Speed Floating Surface Aerator**, is engineered to boost wastewater treatment efficiency. Its powerful design delivers optimal oxygen transfer, improving water quality. Ideally suited for oxidation ponds.

Floating Low Speed Aerator

Our **Floating Low Speed Surface Aerator** is designed for wastewater applications requiring efficient aeration and robust construction. It is ideal where additional aeration is required but no platform is available for a fixed unit.
